# HOPPER PROFILE

[www.esl-eastafrika.com](http://www.esl-eastafrika.com)

# OVERVIEW

- **Refurbished in 2020**, they are as good as new.
- **Designed** for a variety of **bulk cargo** i.e., iron ore, limestone, clinker, coal, bauxite, gypsum, fertilizer, grains, salt, soda ash, etc.
- Accompanied by a hopper spreader, that eases the movement from one point to another.
- Raised 7m high giving room for trucks to park beneath the hopper for loading.
- Incorporated with chutes to control material loading on trucks and avoid spillage during truck change.

- **Max Capacity** - With a max. capacity of 36tonnes, they are capable of withstanding heavy loads.
- **Material flow** - Designed with key considerations of handling bulk material “first-in, first-out” flow sequence ensuring a uniform velocity profile during operation.
- **Zero spillage** - Discharge funnels crafted with chutes to ensure zero spillage.
- **Safety** - Reinforced with H-Beams to withstand external forces preventing collapse.
- **Mobility** - Stored in the port hence can be deployed on short notice.
